SUMMARY

Data Analyst with hands-on experience in SQL, Python, Excel, and Power BI, leveraging data from 50,000+ records and creating 5+ interactive dashboards to support business reporting and decision-making. Skilled in data cleaning, data exploration and data visualization using Pandas, NumPy, and Power BI. Experienced in transforming raw data into Meaningful Findings, uncovering trends, and supporting Business Decisions. Strong analytical skills with experience using Excel and Power BI to generate insights and support business decisions.

TECHNICAL SKILLS

Data Analysis: Data Cleaning, Data Visualization, Exploratory Data Analysis (EDA), Statistical Analysis, Hypothesis Testing

Tools: Python (Pandas, NumPy, Matplotlib, Seaborn), Excel (VLOOKUP, HLOOKUP, Pivot Tables, Conditional Formatting, Formulas), Power BI (DAX, Power Query),

Databases: PostgreSQL, SQL,

Technologies: Git and GitHub, VS Code, Jupyter Notebook, Data Warehousing, Business Intelligence, Reporting Automation

Soft Skills: Communication, Teamwork, Troubleshoot, Task Prioritization, Productivity Management

Experience

SO Infotech – Data Analyst Intern

Feb 2026 - Process

- Processed and evaluated 50,000+ data records using SQL, Python, and Excel to support business reporting.
- Built 5+ interactive Power BI dashboards, replacing manual weekly Excel reporting with real-time KPI tracking.
- Conducted data cleaning and EDA on raw datasets, correcting issues that improved downstream report accuracy.
- Designed optimized SQL queries to extract, aggregate, and validate data from relational databases.

IBM – Data Analyst Intern

Jan 2025 - Feb 2025

- Interpreted and validated 10,000+ records using SQL, Python, and Excel to ensure data accuracy and consistency.
- Processed exploratory data analysis (EDA) to identify trends, patterns, and anomalies within business datasets.
- Created data visualizations and summary reports that helped the team quickly identify key trends, supporting faster and more informed decision-making.

PROJECTS

COVID-19 Analysis

- Reviewed global COVID-19 dataset using Python (Pandas, NumPy) to identify trends and patterns
- Applied hypothesis testing to compare infection trends across regions.
- Conducted exploratory data analysis (EDA) to find peak infection periods and country-wise impact

E-Commerce Sales Dashboard | Power BI

Designed an interactive sales dashboard to track revenue, profit, customer behavior, and product performance, enabling data-driven business decisions.

- Examined more than 10,000 records using SQL, Python, and Excel, correcting discrepancies to enhance data reliability for critical business intelligence initiatives.
- Created 10+ interactive visualizations, including KPI cards, sales trends, profit analysis, and category-wise performance reports.
- Handled data cleaning, transformation, and modeling to improve data quality and reporting accuracy.
- Developed flexible filters, slicers, and DAX measures, enabling self-serve drill-down across products, customers, and regions—cutting ad-hoc reporting requests.

EDUCATION

Master of Computer Applications (MCA) | 2023–2025

Shri Ramswaroop Memorial College of Engineering and Management, Lucknow

Percentage: 70.4%
